

CROP WEATHER WATCH GROUP (CWWG) WEEKLY REPORT

(as on 21.04.2025)

Key Insights

- 1. Summer Sowing Status:** As on April 18, 2025, the area sown under the Summer crops is 68.80 lakh ha as compared to 59.73 lakh ha during the corresponding period of last year. Of this, area of 31.57 lakh ha has been sown under rice this year against the previous year area of 27.60 lakh ha (increase of 3.97 lakh ha).
- 2. Rabi harvesting Status:** As on 18.04.2025, 79.46% of Rabi sown area has been harvested all over India. Approximately 98.00% area of Pulses mainly in Gram (98%), Kulthi (100%), Urdbean (97%), Moongbean (97%); 86.71% area of Shri Anna & Coarse Cereals mainly in Jowar (98.00%); 98.78 % area of Oilseeds majorly in Rapeseed & Mustard (99.30%); 68.00% of Wheat and 52.15% area of Rice has been harvested for Rabi crops 2024-25.
- 3. Rabi Season Area Coverage:** For **Rabi horticulture crops**, major producing states report the following sowing areas: Onion – 12.58 lakh ha (9.76 lakh ha last year), Potato – 20.03 lakh ha (19.56 lakh ha last year), Tomato – 3.21 lakh ha (3.14 lakh ha last year).
- 4. Weather Update:**
 - a) Temperature:** Gradual rise in maximum temperatures by 2-3°C likely over Northwest India & by 4-6°C likely over East India during next 4-5 days and no significant change during subsequent 2-3 days.

No significant change in maximum temperatures likely over rest parts of the country.
 - b) Rainfall Distribution:** From Mar 01– 21 April, 2025, the All-India cumulative rainfall is 15% lower than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: -36%; (ii) Northwest India: -29%; (iii) Central India: 10%; and South Peninsula: 76%.

An intense Western Disturbance likely to affect Western Himalayan Region from 16th. Thunderstorm accompanied with lightning & Gusty wind speed and isolated Heavy rainfall likely over East and North East India during the Week.

A north south trough from central Assam to Tripura and 2nd from central Pakistan & adjoining northwest Rajasthan to central parts of Bangladesh; 3rd trough from northeast Madhya Pradesh to Gulf of Mannar in lower tropospheric levels.

Heavy rainfall likely over Arunachal Pradesh & Assam & Meghalaya during 22nd-24th with very heavy rainfall at isolated places over Assam & Meghalaya on 22nd April.

5. Inputs Situation:

- a) **Water Reservoir Status:** As on 17th April 2025, the total live water storage in 161 important reservoirs across the country (monitored by CWC) is 66.82 Billion Cubic Meter, which is 37% of total live storage capacity (182.37 BCM). The current year's storage is nearly 115 percent of last year's storage and 117 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.
- b) **Groundwater Levels:** Approximately 66.6% of monitoring wells show water levels between 0-5 m, while 29.1% report levels between 5-10 m. Decadal analysis (2014-2023) indicates a rise in 64.9% of wells and a decline in 35.1% as of August 2024.
- c) **Seeds and Fertilizers:** For Rabi 2024-25, certified seed availability is 337.98 lakh quintals against a requirement of 307.07 lakh quintals, ensuring a surplus of 30.90 lakh quintals. The fertilizer supply remains stable across all products.
6. **Pests & Diseases:** Intensity of pests and diseases, at some fields, has been reported to be above Economic Threshold Level for Water melon and Musk melon (*Fusarium wilt*) in Uttar Pradesh. The Advisory has been issued by the survey team to the farms and regular monitoring is being carried out. The overall intensity of pests and diseases remained below the Economic Threshold Level.

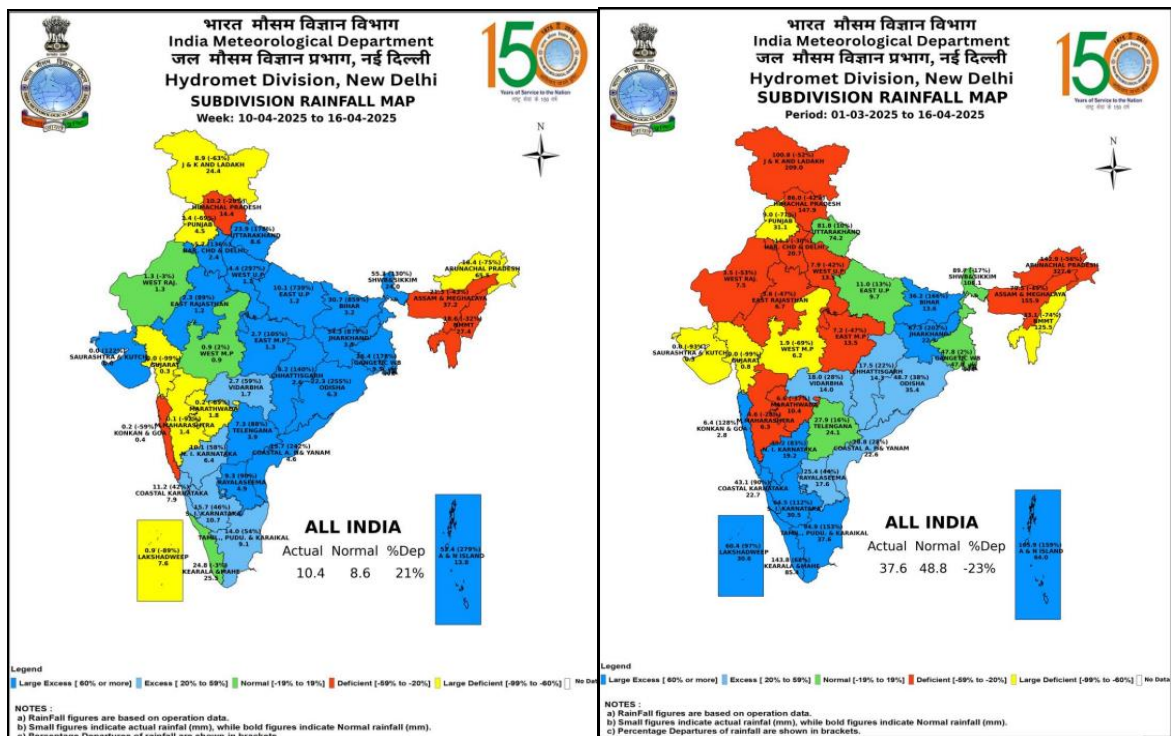

7. Crops whose Mandi Wholesale prices are below MSP:

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 16-04-2025	% Variation over MSP
Arhar whole	7550	7019	-7.03
Masur whole	6700	6181	-7.75
Groundnut	6783	5404	-20.33
Mustard	5950	5819	-2.20
Soyabean	4892	4337	-11.35
Sunflower	7280	4859	-33.26
Sesamum	9267	8770	-5.36

Details of each Segment

1. RAINFALL

- During the week (10 – 16 April 2025), higher rainfall was observed, as compared to Long Period Average (LPA) by 21%. Cumulative seasonal rainfall (01st Mar to 16th April 2025) is lower than LPA by 23%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- RainFall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

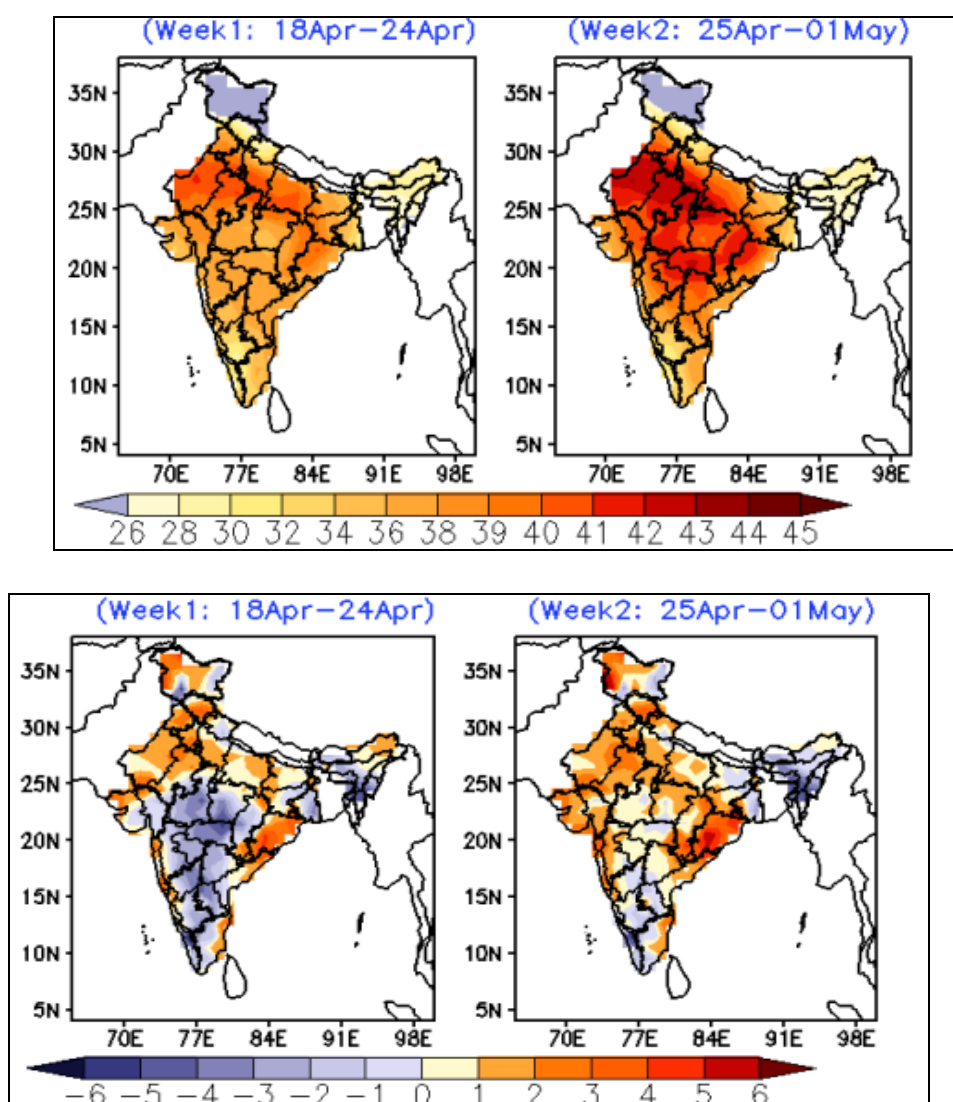

17 April – 23 April 2025

- A Western Disturbance seen as a cyclonic circulation over West Iran & neighbourhood in middle & upper tropospheric levels.
- Thunderstorm, lightning & gusty winds with isolated hailstorm likely over Western Himalayan Region on 18th & 19th April; with gusty winds over Himachal Pradesh on 20th; Uttarakhand on 20th & 21st April.
- No significant weather likely over rest parts of the country during the week.

24 April – 30 April 2025

- Under the influence of western disturbances, isolated to scattered rainfall is likely over Western Himalayan Region during some days of the week.
- Due to trough/cyclonic circulations over East India, light/moderate scattered to fairly widespread rainfall along with thunderstorm & lightening are likely over east & northeast India during some/many days of the week. Isolated heavy rainfall is also likely over northeast India during some days of the week.
- Light/moderate rainfall along with thunderstorm & lightening also likely over south Peninsular India during some days of the week.
- Overall, normal to above normal rainfall along with thunderstorm & lightening are likely over many parts of East & northeast India and South Peninsular India; near normal over parts of central India and below normal over many parts of northwest India including Western Himalayan Region during the week.

2. TEMPERATURE: MIN & MAX

Temperature Forecast:

17 April – 23 April 2025

- No significant change in maximum temperatures likely over Northwest India during next 2 days; gradual fall by 2-4°C during subsequent 3 days and rise by 2-3°C during subsequent 2 days.
- Gradual rise in maximum temperatures by 2-3°C likely over Central India during next 5 days and no significant change during subsequent 2 days.
- No significant change in maximum temperatures likely over East India during next 3 days and gradual rise by 2-4°C during subsequent 4 days.
- No significant change in maximum temperatures likely over rest parts of the country.

24 April – 30 April 2025

- Maximum temperatures are likely to be above normal by 1-3°C over many parts of northwest, central & east India. It is likely near normal or below normal over rest parts of the country.
- There is a low to moderate probability of heat wave conditions over some/isolated pockets of Rajasthan, south Haryana & south Punjab, Gujarat and north Madhya Pradesh during some days of the week.

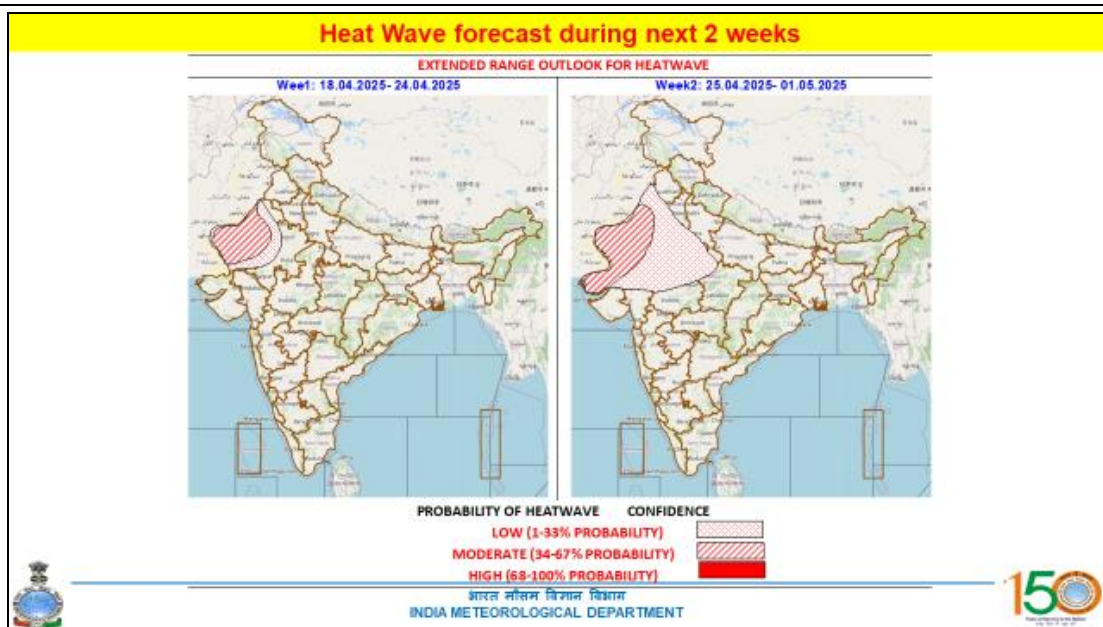

Heat Wave forecast:

Week 1 (18 – 24 April)

- Heat wave conditions very likely in isolated pockets over south Uttar Pradesh, Madhya Pradesh during 22nd -24th; Rajasthan, Haryana on 23rd & 24th; Vidarbha during 21st - 23rd April.
- Hot & humid weather is likely to prevail over Madhya Maharashtra, Marathwada on 20th; Tamilnadu Puducherry & Karaikal during 20th -22nd and over Gujarat State during 22nd -24th April.

Week 2 (25 April – 01 May)

- There is a low to moderate probability of heat wave conditions over some/isolated pockets of Rajasthan, south Haryana & south Punjab, Gujarat and north Madhya Pradesh during some days of the week.

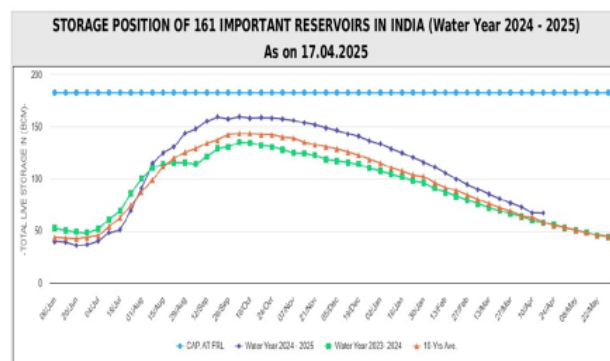

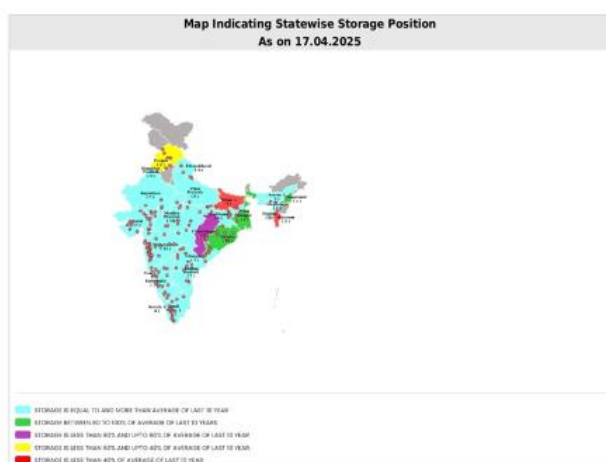

3. RESERVOIR STORAGE (as on 17th April, 2025)

Current live storage in 161 reservoirs was 66.82 BCM (37%) of total live capacity of 182.37 BCM.

Table 1: For 161 major reservoirs of the country

Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	37	115	117
Last Week	37	111	111

- 124 reservoirs having storage more than 80% of normal storage.
- 25 reservoirs having storage 51% to 80%.
- 12 reservoirs having storage up to 50%.

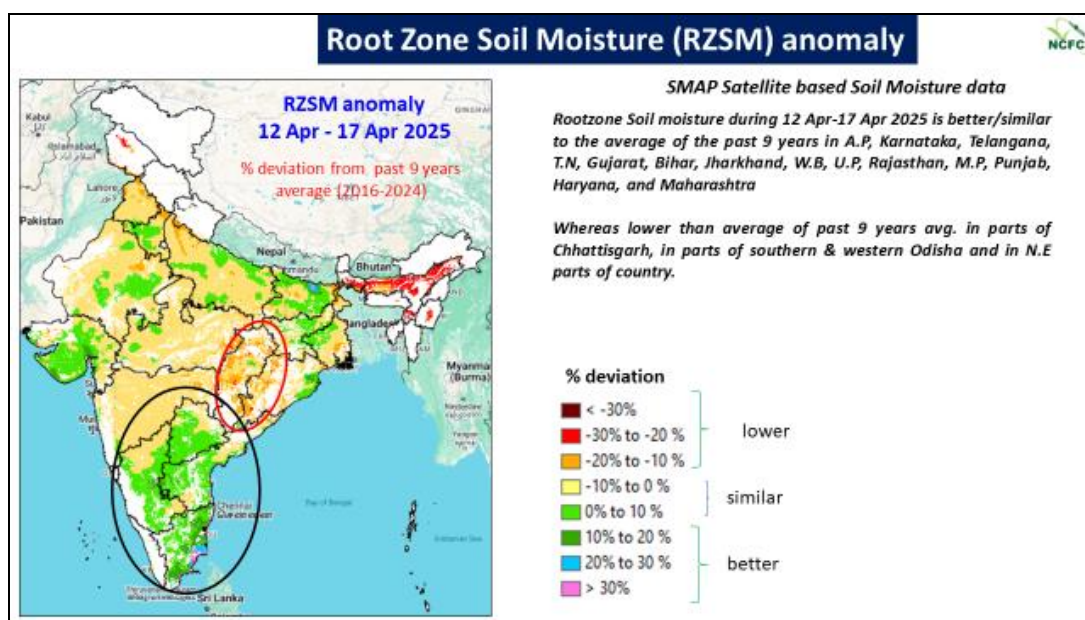

Source: CWC

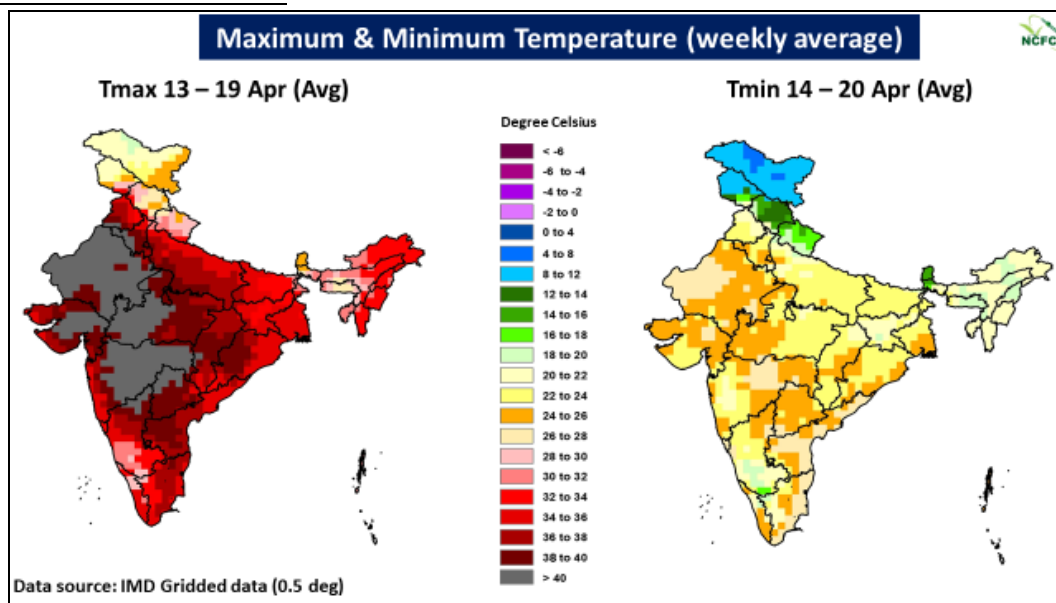

4. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

(a) Soil Moisture Observation

- Soil moisture during 12 – 17 April 2025 is better/similar to the average of the past 9 years in A.P, Karnataka, Telangana, Tamil Nadu, Gujarat, Bihar, Jharkhand, W.B., U.P., Rajasthan, M.P, Punjab, Haryana and Maharashtra.
- Whereas it is lower than average of past 9 years avg. in parts of Chhattisgarh, in parts of southern & western Odisha and in N.E. part of the country.

(b) Temperature Observation

CROP SOWING STATUS FOR RABI SEASON

Summer Crops - Area coverage

- As on 18.04.2025, about 96.4 percent of the normal area has been sown under the Summer season crops.
- Rice:** About 31.57 lakh ha area coverage under Summer Rice has been reported as compared to 27.60 lakh ha during the corresponding period of last year.
- Pulses:** About 16.56 lakh ha area coverage has been reported compared to 13.44 lakh ha during the corresponding period of last year.
- Oilseeds:** About 9.16 lakh ha area coverage has been reported compared to 8.77 lakh ha during the corresponding period of last year.

Government of India
Ministry of Agriculture & Farmers Welfare
Department of Agriculture & Farmers Welfare
Crops Division

Progress of Area coverage under Summer crops as on 18.04.2025

Area: In lakh hectare

Sl. No.	Crops	Normal Summer Area (DES)	Area Sown		Increase/ Decrease over Last year
			Current Year 2025	Last Year 2024	
1	Rice	30.795	31.57	27.60	3.97
2	Pulses	21.645	16.56	13.44	3.12
a	Green gram	18.950	13.66	10.96	2.70
b	Black gram	2.695	2.71	2.30	0.41
c	Other Pulses	0.000	0.18	0.18	0.00
3	Shree Anna cum Coarse Cereals	11.048	11.51	9.92	1.59
a	Jowar	0.335	0.42	0.31	0.11
b	Bajra	4.100	4.08	4.11	-0.03
c	Ragi	0.306	0.13	0.18	0.04
d	Small Millets	0.017	0.03	0.00	0.03
e	Maize	6.290	6.85	5.32	1.53
4	Oilseeds	7.855	9.16	8.77	0.39
a	Groundnut	2.995	4.31	4.11	0.20
b	Sunflower	0.340	0.36	0.31	0.05
c	Sesamum	4.520	4.43	4.18	0.25
d	Other Oilseeds	0.000	0.06	0.17	-0.11
Total		71.343	68.80	59.73	9.07
The Summer Sowing is going on smoothly. Expected to achieve normal area.					

Disclaimer : For Kharif crop wise estimated area, please see advanced estimates released by Ministry of Agriculture and Farmers' Welfare available on UPAg (upag.gov.in)

Rabi Horticulture Crops

Status of Sowing of Onion, Potato and Tomato in major producing States for Rabi Season as on 17th April, 2025

Area in Lakh Hectare

Crop	Normal Rabi Area Sown in major producing States	Area Sown** during 2024-25	Area Sown in the corresponding period of 2023-24	Increase/Decrease in 2024-25 over 2023-24
(1)	(2)	(3)	(4)	(5)
Onion	10.29	12.58	9.76	2.82
Potato	18.23	20.03	19.56	0.47
Tomato	3.83	3.21	3.14	0.07

Note - 1: The figures for major producing States in Onion and Tomato have been revised by including area sown of West Bengal.

2. The Figures for Maharashtra in Rabi Onion area sown is provisional. District-wise details regarding the over-achievement of 1.5 LHA (6.52 LHA achievement where target was 5 LHA) in Maharashtra, is yet to be received. The Rabi onion area figures will be re-assessed through filed visit by the end of April, 2025.

- Normal Area is the average sown area in last 5 years (2019-20 to 2023-24).
- The share of major producing States is nearly 85% in case of Rabi Potato and Tomato and 90% in case of Rabi onion.
- The total normal Rabi sown area in the Country (including minor producing States) was 11.37 LHA for Onion, 21.47 LHA for Potato and 5.80 LHA for Tomato.
- Transplanting of Tomato crop for the ongoing Rabi season is progressing smoothly.
- The sowing window is still available for Tomato crop. Given the good prices prevailing in the market, it is expected to achieve the normal area.

** In case of Onion and Tomato, transplanted area is reported.

¹Major Producing States for Rabi Onion are: Maharashtra, Madhya Pradesh, Karnataka, Bihar, Rajasthan, Gujarat, Andhra Pradesh, Haryana, Uttar Pradesh, Telangana and Tamil Nadu

Major Producing States for Rabi Potato are: Uttar Pradesh, West Bengal, Bihar, Gujarat, Madhya Pradesh, Punjab and Haryana

Major Producing States for Rabi Tomato are: Andhra Pradesh, Madhya Pradesh, Karnataka, Gujarat, Maharashtra, and Telangana

5. FERTILIZER POSITION:

Availability of fertilizer has been found comfortable. Details of Requirement, Receipt, Availability, Sales and Stock position of Major Fertilizers (Urea, DAP, MOP, Complex and SSP) during Rabi 2024-25 as on 21.04.2025 is given below:

(Unit : in Lakh MT)

Product	Total Requirement Kharif 2025	Total Requirement Kharif 2024	Opening stock as on 1.4.25	Opening stock as on 1.4.24	Requirement during April, 2025	Requirement during April, 2024	(as 21/4/25)			(as on 19/4/24)		
							Availability	Sales	Closing stock	Availability	Sales	Closing stock
UREA	185.40	177.13	55.96	79.83	21.96	20.24	71.59	7.71	63.88	94.86	6.01	88.85
DAP	56.99	59.87	9.15	17.75	7.81	7.66	11.32	1.24	10.09	19.51	1.25	18.26
MOP	11.13	10.26	8.83	6.36	1.53	1.34	9.41	0.60	8.81	6.63	0.35	6.28
NPK	76.51	74.19	34.04	40.16	8.53	7.68	39.53	2.36	37.17	43.96	1.58	42.38
SSP	32.57	36.12	21.58	18.70	3.95	4.37	23.46	1.01	22.45	19.89	0.64	19.25
TOTAL	362.60	357.56	129.55	162.79	43.79	41.28	155.31	12.91	142.39	184.85	9.83	175.02

- The above data indicates that the availability of Urea, MOP, Complexes and SSP is comfortable.
- In case of DAP, the opening stock of Kharif 2025 as compared to the opening stock of Kharif 2024 is less by 11.94 LMT
- As on 21st April, 2025 the availability of DAP is 11.32 LMT against the requirement of 7.81 LMT during the ongoing Kharif 2025 season.

6. PEST & DISEASE

Over all intensity of pests and disease remained below Economic Threshold Level (ETL) except:

Crop	State	District/ Sub District/ Village	Source	Pest/ Disease	Intensity	Action Taken/ Remark
					Area infested/Infected above *ETL (ha)	
Water melon and Musk melon 'Bobby' variety of Muskmelon	Uttar Pradesh	Barabanki/ Fatehpur	Survey by RCIPMC Lucknow And State Agriculture Department	Fusarium wilt	7 ha.	- Regularly carry out survey / surveillance for early detection of potential incursions of the diseases. - Sanitation by immediate removal of diseased infected plants with surrounding soil from the field and its destruction. - Restrict the movement of plant parts, animals, equipment, tools, water & soil from infected areas to healthy areas. - Crop rotation should be encouraged and avoid planting of same variety over the whole areas. - Excessive humidity is multiplier of diseases, avoid flood irrigation. Restrict the soil running water from infected area to healthy area and also provide good drainage facilities. - Infection was also caused through injured roots so avoid root injury during intercultural operation. - Use CIB&RC recommended fungicide for management of diseases.
