

(as on 26.05.2025)

Key Insights

1. **Summer Sowing Status:** As on May 23, 2025, the area sown under the summer crops is 82.23 lakh ha as compared to 73.77 lakh ha during the corresponding period of last year. Of this, area of 34.16 lakh ha has been sown under rice this year against the previous year area of 30.11 lakh ha (increase of 4.06 lakh ha).
2. **Rabi harvesting Status:** As on 23.05.2025, 99.67% of Rabi sown area has been harvested all over India. 100.00% area of Wheat, Pulses and Oilseeds have been harvested; 98.57% area of Shri Anna & Coarse Cereals mainly in Jowar (100%) & Maize (96.66%) and 96.69% area of Rice has been harvested for Rabi crops 2024-25.
3. **Rabi Season Area Coverage:** For **Rabi horticulture crops**, major producing states report the following sowing areas: Onion – 12.58 lakh ha (9.76 lakh ha last year), Potato – 20.03 lakh ha (19.56 lakh ha last year), Tomato – 3.29 lakh ha (3.14 lakh ha last year).
4. **Weather Update:**
 - a. **Temperature:** Gradual rise in maximum temperatures likely over Northwest India by 3-4°C during next 4-5 days. No significant change in maximum temperatures likely over rest parts of the country.
 - b. **Rainfall Distribution:** From Mar 01– 26 May, 2025, the All-India cumulative rainfall is 26% higher than its Long Period Average (LPA), with regional variations: (i) East & Northeast India: -12%; (ii) Northwest India: -19%; (iii) Central India: 192%; and South Peninsula: 108%.

A well marked low pressure area lay over south Madhya Maharashtra and adjoining areas of Marathwada & North Interior Karnataka.

Heavy to very heavy rainfall likely to continue over west coast (Kerala, Karnataka, coastal Maharashtra & Goa) during next 7 days with possibility of extremely heavy rainfall over Kerala during 25th-26th; Coastal and Ghat areas of Karnataka during 25th-27th; Ghat areas of Tamil Nadu on 25th & 26th May, 2025.

Overall, above normal rainfall activity likely over northwest, central, east & northeast India; and normal to over many parts of northwest & northeast India during the week.

Inputs Situation

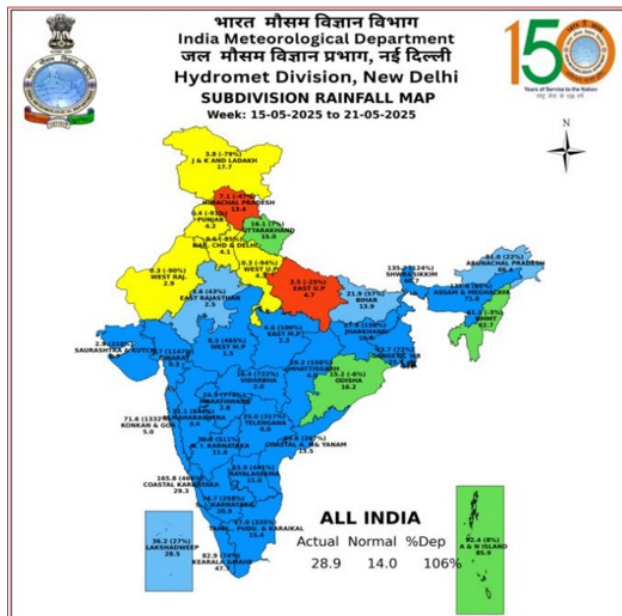

- a. **Water Reservoir Status:** As on 22nd May 2025, the total live water storage in 161 important reservoirs across the country (monitored by CWC) is 53.58 Billion Cubic Meter, which is 29.4% of total live storage capacity (182.44 BCM). The current year's storage is nearly 120 percent of last year's storage and 118 percent of the average storage of the last ten years during the corresponding period. The overall storage position is better than the corresponding period of last year in the country as a whole and is also better than the Normal storage during the corresponding period.
 - b. **Groundwater Levels:** Approximately 66.6% of monitoring wells show water levels between 0-5 m, while 29.1% report levels between 5-10 m. Decadal analysis (2014–2023) indicates a rise in 64.9% of wells and a decline in 35.1% as of August 2024.
 - c. **Seeds and Fertilizers:** For Rabi 2024-25, certified seed availability is 337.98 lakh quintals against a requirement of 307.07 lakh quintals, ensuring a surplus of 30.90 lakh quintals. The fertilizer supply remains stable across all products.
6. **Pests & Diseases:** Over all intensity of pests and disease remained below Economic Threshold Level (ETL) and no major pest incidence was recorded.
 7. **Crops whose Mandi Wholesale prices are below MSP:**

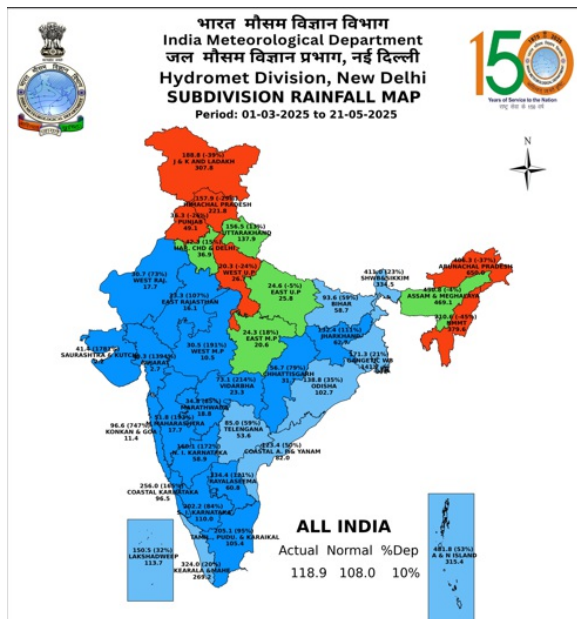

All India Mandi Wholesale Prices			
Commodities	MSP (RS/Qtl)	Price as on 23-05- 2025	% Variation over MSP
Arhar whole	7550	6740	-10.73
Masur whole	6700	6454	-3.67
Moong whole	8682	8090	-6.82
Urad whole	7400	6801	-8.09
Groundnut	6783	4945	-27.10

Rice (un milled)	2300	2154	-6.35

Details of each Segment

1. RAINFALL

- During the week (15 – 21 May 2025), higher rainfall was observed, as compared to Long Period Average (LPA) by 106%. Cumulative seasonal rainfall (01th Mar to 21st May 2025) is higher than LPA by 10%.

Legend

Large Excess [60% or more] Excess [20% to 59%] Normal [-19% to 19%] Deficient [-59% to -20%] Large Deficient [-99% to -60%] No Rain [-100%] No Data

NOTES :

- RainFall figures are based on operation data.
- Small figures indicate actual rainfall (mm), while bold figures indicate Normal rainfall (mm).
- Percentage Departures of rainfall are shown in brackets.

Rainfall Forecast:

22 May – 28 May 2025

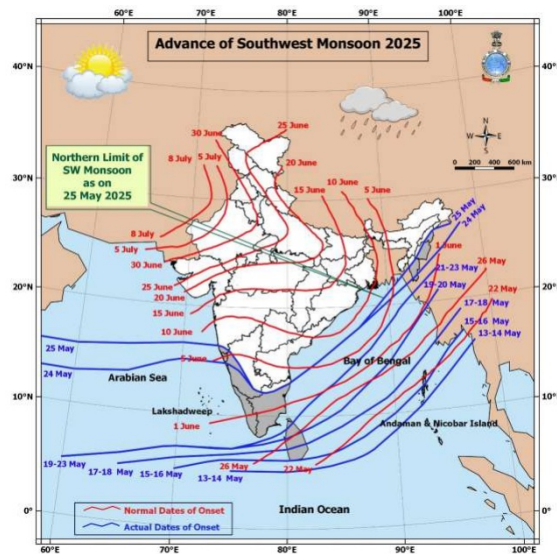

- Rainfall is likely to be above normal over Central India, East India, Maharashtra, Coastal Andhra Pradesh, Telangana and Uttar Pradesh. However, it is likely to be below normal over North East India.

29 May – 04 June 2025

- A low pressure area is likely to form over westcentral & adjoining North Bay of Bengal around 27th May. It is likely to become more marked during subsequent 2 days. Under the influence of this system and trough from the system to northwest India, enhanced rainfall activity with isolated heavy to very heavy rainfall likely over northwest, East & Northeast India during many days of the week.
- Due to strong westerly winds along the west coast and other favourable cyclonic circulations/trough in lower tropospheric levels, fairly widespread to widespread with isolated heavy to very heavy rainfall likely over Kerala, Karnataka, Maharashtra and Gujarat during many days of the week.
- Overall, above normal rainfall activity likely over northwest, central, east & northeast India; and normal to over many parts of northwest & northeast India during the week.

Advance of Southwest Monsoon:

- The Southwest Monsoon has further advanced into some more parts of west central & east central Arabian Sea, some more parts of Karnataka, entire Goa, some parts of Maharashtra, some more parts of west central and north Bay of Bengal, and some more parts of Mizoram, some parts of Manipur and Nagaland today, the 25th May 2025.
- Conditions are favourable for further advance of Southwest Monsoon into some more parts of central Arabian Sea, some more parts of Maharashtra including Mumbai, Karnataka including Bengaluru, some parts of Andhra Pradesh, remaining parts of Tamil Nadu, some more parts of west central & North Bay of Bengal and some more parts of Northeastern states during next 3 days.

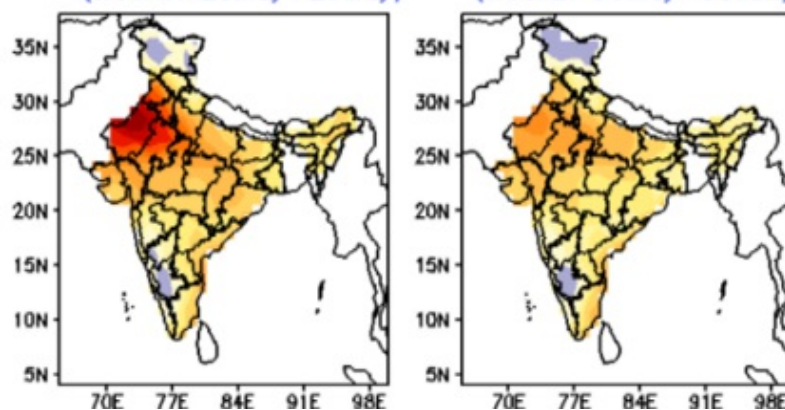

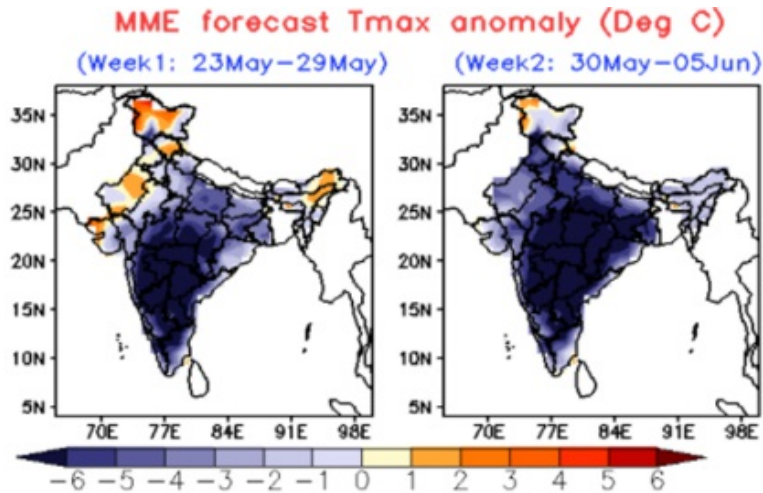

2. TEMPERATURE: MIN & MAX

MME Bias corrected forecast Tmax (Deg C)

(Week1: 23May-29May)

(Week2: 30May-05Jun)

Temperature

Week 1 (23rd – 29th May 2025):

- Maximum temperature is likely to be above normal over many parts of West Rajasthan, some parts of Saurashtra-Kutch, Jammu & Kashmir, Himachal Pradesh and Arunachal Pradesh and below normal over remaining parts of the country.

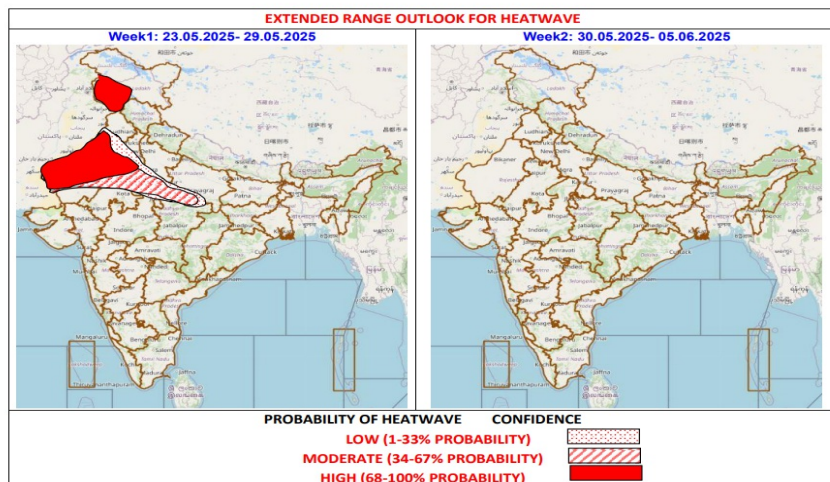

Week 2 (30th May - 05 June 2025):

- Maximum temperature is likely to be below normal over most parts of the country.

Heat Wave Forecast for next 2 weeks:

- Heat wave to severe heat wave conditions in isolated pockets of West Rajasthan during 22nd - 24th May.
- Heat wave conditions very likely in isolated pockets of Jammu, Punjab, Haryana Chandigarh, north Madhya Pradesh on 22nd & 23rd East Rajasthan during 22nd - 24th and West Rajasthan on 25th & 26th May.
- Isolated pockets of West Rajasthan on 26th May. Heat wave conditions very likely in isolated pockets of East Rajasthan on 26th; West Rajasthan on 27th May.

Heat Wave forecast during next 2 weeks

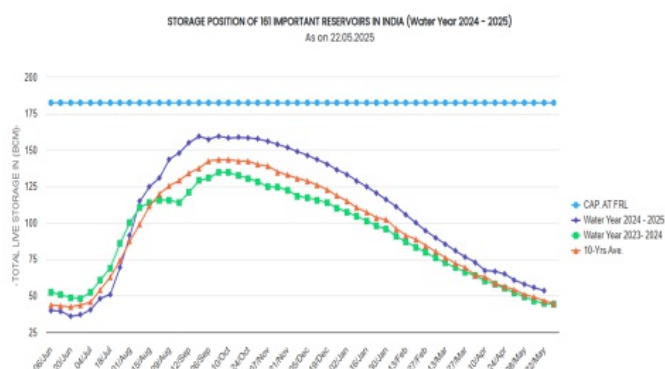

3. RESERVOIR STORAGE (as on 22nd May, 2025)

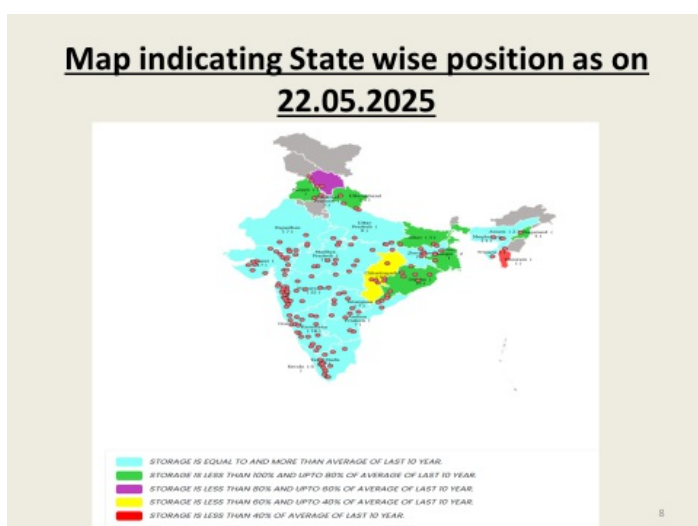

Current live storage in 161 reservoirs was 53.58 BCM (29.4%) of total live capacity of 182.44 BCM.

Table 1: For 161 major reservoirs of the country

Period	Storage as % of FRL	Storage as % of Last Year	Storage as % of 10 Year's Average Level
Current Week	29	120	118
Last Week	30	119	115

- 122 reservoirs having storage more than 80% of normal storage.
- 23 reservoirs having storage 51% to 80%.
- 16 reservoirs having storage upto 50%.

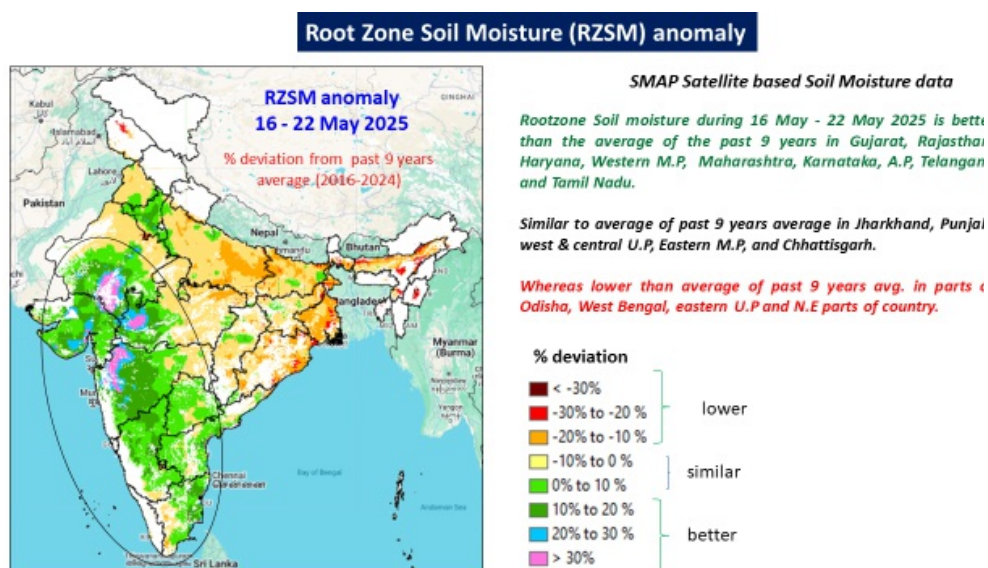

Source: CWC

4. REMOTE SENSING BASED SOIL MOISTURE OBSERVATION

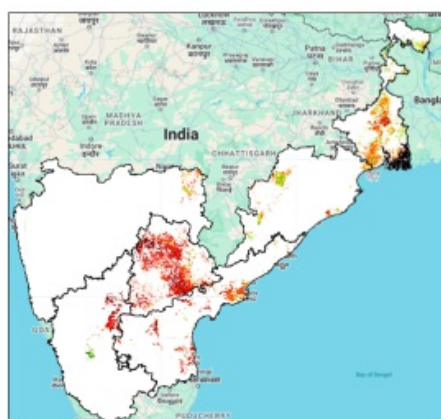

(a) Soil Moisture Observation

- Soil moisture during 16 May – 22 May 2025 is better to the average of the past 9 years in Gujarat, Rajasthan, Haryana, Western M.P, Maharashtra, Karnataka, A.P., Telangana and Tamil Nadu.
- Similar to average of past 9 years average in Jharkhand, Punjab, West & Central U.P, Eastern M.P and Chhattisgarh.
- Whereas lower than average of past 9 years avg. in parts of Odisha, West Bengal, Bihar, Eastern UP and North Eastern parts of country.

b) Rabi/Summer Paddy Harvest Status

Rabi/Summer Paddy crop harvested/near-harvest – till 23 May 2025

In current season Rabi/summer paddy area coverage in A.P, Karnataka and Telangana state was higher as compared to last year.

Rabi/Summer paddy harvest status:

Andhra Pradesh – 82%
Karnataka – 85% (koppal, raichur, bellary, yadgir)
Telangana – 87 %
Odisha – 30-38 % (balasore, puri district)
Maharashtra – 30%
West Bengal – 70%

Overall 75-80% harvested

CROP SOWING STATUS FOR RABI SEASON

Summer Crops - Area coverage

- As on 23.05.2025, about 115.3 percent of the normal area has been sown under the summer season crops.
- Rice:** About 34.16 lakh ha area coverage under Summer Rice has been reported as compared to 30.11 lakh ha during the corresponding period of last year.
- Pulses:** About 24.25 lakh ha area coverage has been reported compared to 21.48 lakh ha during the corresponding period of last year.
- Oilseeds:** About 9.45 lakh ha area coverage has been reported compared to 9.23 lakh ha during the corresponding period of last year.

Rabi Horticulture Crops

Status of Sowing of Onion, Potato and Tomato in major producing States for Rabi Season as on 23 rd May, 2025				
Area in Lakh Hectare				
Crop	Normal Rabi Area Sown in major producing States	Area Sown** during 2024-25	Area Sown in the corresponding period of 2023-24	Increase/Decrease in 2024-25 over 2023-24
(1)	(2)	(3)	(4)	(5)
Onion	10.29	12.58	9.76	2.82
Potato	18.23	20.03	19.56	0.47
Tomato	3.83	3.29	3.14	0.15

Note - 1: The figures for major producing States in Onion and Tomato have been revised by including area sown of West Bengal.

2. The Figures for Maharashtra in Rabi Onion area sown is provisional. District-wise details regarding the over-achievement of 1.52 Lakh Ha (6.52 Lakh Ha achievement against target area of 5 Lakh Ha) in Maharashtra, is yet to be received. The Rabi Onion area figures will be re-assessed through interactions/discussions/communications with District officers by May, 2025.

- Normal Area is the average sown area in last 5 years (2019-20 to

2023-24).

- The share of major producing States is nearly 85% in case of Rabi Potato and Rabi Tomato and 90% in case of Rabi Onion.
- The total normal sown area in the Country (including minor producing States) was 11.37 Lakh Ha for Rabi Onion, 21.47 Lakh Ha for Rabi Potato and 5.80 Lakh Ha for Rabi Tomato.

** In case of Onion and Tomato, transplanted area is reported.
